High Performance Ceramics

01

The raw materials

For us, it is a matter of course that only materials with the best properties come into consideration for dental products. The biocompatibility is the ultimate priority, in the selection of raw materials. Moreover only a high-purity, nanoscale ZrO_2 is suitable for medical use. To ensure reproducible batch stability, the raw material must indicate an extremely homogenous grain size distribution.

Multi Additive Technology® – more than just color

We achieve brilliant color effects by adding selected ions of rare soils or transition metals into the zirconium matrix. Our balanced ion formulation and the homogeneous distribution in the zirconia structure is what we call Multi Additive Technology®. It is the key to excellent optical characteristics.

By means of our Multi Additive Technology colored blanks show a natural chroma based on the definition in the VITA classical® color scale.

	DDBioZ DDBioZcolor				

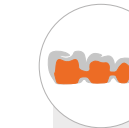

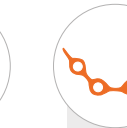

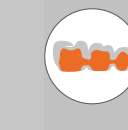

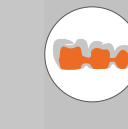

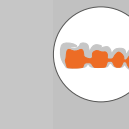

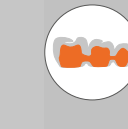

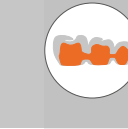

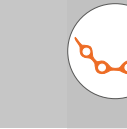

*An individual selection of the appropriate material is necessary to ensure the best possible restoration.

Influence on the final shade of a fixed restoration

When choosing a zirconia material for a specific clinical case several aspects should be considered, because the individual patients conditions might offer very different preconditions.

An important factor is the shade of the prepared tooth. If there is no serious deviation from the desired final shade of the fixed restoration, a super high translucent zirconia (DD cubeX²) might be the material of choice.

The quantity of substance removal by preparation can be significant as well, as it affects the wall thickness of the restoration. There is a direct context between the underlying tooth structure, the wall thickness and the resulting shade effect of the restoration.

monolithic CROWN posterior tooth	Hybrid ABUTMENT CROWN	monolithic BRIDGE (up to 3 units)	monolithic BRIDGE	reduced BRIDGE (up to 3 units)	reduced BRIDGE	Hybrid ABUTMENT	BAR
							
							
							
							
							
							

Indication guide_DD medical zirconia_Rev.07_2022/08

In case of a significantly discolored stump and preparation with low substance removal a more opaque zirconia (DD Bio ZX², DD Bio Z) could be used to cover up the underlying structure.

Especially when working with a high translucent plus (DD cube ONE®) or super high translucent (DD cubeX²®) zirconia material also the cement has to be well-chosen, taking its level of opacity and shade into consideration. Opaque or colored cementation materials might change the final shade of a restoration.

You find our cementation guide on www.dentaldirekt.de/en/downloads

DDcubeX²[®]

DDcubeX²[®]

cubic zirconia system

Super High Translucent (5Y-TZP)

WHITE

Benefits

- More stable than lithium disilicate with comparable aesthetics
- Our favorite for the anterior region

Perfectly suitable for

- High aesthetic monolithic crowns and bridges (up to 3 units)
- Especially for monolithic anterior restorations (bridges up to 3 units)
- Cut back (one layer)
- High aesthetic veneering

Technical data

Type	5Y-TZP
Classification	Class IIa according to MDD/MDR
Indication ISO 6872	Type II, class 4 – max. 3 unit bridges
Color	White
Aesthetics	Super High Translucent
Sintering temperature	1.450 °C
Flexural strength	700 (±100) MPa*
CAM system	Open systems for Ø 98,5 mm blanks
DD Coloring liquids	DD Pro Shade C DD Basic Shade DD Art Elements
Aesthetic Finish	DD contrast®

* measured according to DIN EN ISO 6872

DDcubeX²ML[®]

multilayer – cubic zirconia system

Super High Translucent (5Y-TZP)

Benefits

- More stable than lithium disilicate with comparable aesthetics
- Our favorite for the anterior region in 16 VITA®- + 1 Bleach shade
- Incisal layer and dentine layer + 2 transition layers = natural color gradient

Perfectly suitable for

- High aesthetic monolithic crowns and bridges (up to 3 units)
- Especially for monolithic anterior restorations (bridges up to 3 units)
- Cut back (one layer)
- High aesthetic veneering

Technical data

Type	5Y-TZP

Nacera® Pearl Natural

Nacera® Pearl Natural

Super High Translucent (6Y-PSZ)
High Translucent (3Y-TZP)

Benefits

- Naturally soft color and translucency transitions for lifelike looking monolithic restorations
- 16 VITA® shades, two VITA® bleach shades and one special bleach shade
- Highest precision due to distortion-free material
- High process reliability during processing – uncritical positioning during nesting
- Fast and cost-effective for natural-looking monolithic restorations

Perfectly suitable for

- All indications: from monolithic single crowns to complex superstructures for the anterior and posterior region

Technical data

Type	6Y-PSZ + 3Y-TZP
Classification	Class IIa according to MDD/MDR
Indication ISO 6872	Type II, class 5 – all dental constructions, bridges with max. 2 connected pontics

DDBio²color

natural chroma – high translucent zirconia
according to VITA® shades

High Translucent (3Y-TZP-LA)

Benefits

- Further development of the 'classic' zirconia in 16 VITA® shades
- High strength
- High fracture toughness

Perfectly suitable for

- Monolithic crowns and bridges (of any span range)
- Especially for monolithic bridges
- Cut back (one layer)
- High aesthetic veneering (of any span range)

Technical data

Type	3Y-TZP-LA
Classification	Class IIa according to MDD/MDR
Indication ISO 6872	Type II, class 5 – all dental constructions, bridges with max. 2 connected pontics
Color	Precolored acc. to VITA®
Aesthetics	High Translucent
Sintering temperature	1.450 °C
Flexural strength	1.150 (±150) MPa*
CAM system	Open systems for Ø 98,5 mm blanks
Multi Additive Technology®	Reliable reproduction of color via industrial coloring
DD Coloring liquids	DD Art Elements DD Incisal X
Aesthetic Finish	DD contrast®

Coloring Liquids

02

Coloring Liquid recommendation

exemplified by the shade reference VITA® A2

DDBasicShade
Universal Dentine Liquid

DDBioZ

more grayish

DDBioZX²

more grayish

DDcubeONE®

more grayish

DDcubeX²®

more grayish

Recommendation

Color concept:
(shade/color saturation)

Brightness:

DD recommendation:

intensive chroma, higher gray value

LESS brightness

minimum layering (cut back),
full veneering, combination of both techniques

DDProShade^Z
Special Dentine Liquid

DDProShade^C
Special Dentine Liquid

Color concept:
(shade/color saturation)

less intensive chroma, warmer shade

Brightness:

MORE brightness

DD recommendation:

Basic coloring with the recommended DD Pro Shade.

Further characterization: For monolithic crowns/bridges made of DD cubeX²® or DD cube ONE® an individual coloring (DD contrast® color and form concept) or minimal layering (cut back). For constructions made of DD Bio ZX² or DD Bio Z a ceramic veneer.

DDBasicShade

Universal Dentine Liquid

DD Basic Shade is a universal dentine coloring liquid for all non-pre-shaded Dental Direkt zirconia types.

DD Basic Shade is used before the sintering process.

Shade guide	VITA® classical (dentine)

DDIncisalX

Translucency-increasing liquid

The liquid has been specially developed to "pimp" the incisal area of high-strength zirconium oxide restorations and thus ensure even more aesthetic results. DD Incisal X is available in two variants and offers you the greatest flexibility in individualizing your crown and bridge restorations. The application with the enclosed applicators simplifies the handling. By recommended application, the translucent gradient is enhanced.

In short: similarly beautiful to a veneer, but without the great effort.

Benefits

- Two variants for creative working
- Better aesthetics in the incisal area for high-strength, opaque materials
- Aesthetic enhancement without the expense of a veneer

DD Incisal X – X0

Pure translucency-increasing liquid

Add the finishing touch to your restoration. Create contrast between the dentin and the incisal edge or perfect your individualization in combination with DD Art Elements.

Recommended for

- DD cube ONE® ML
- DD Bio ZX² color

Content:

- 1 watch glass
- 10 applicators
- 5 ml DD Incisal X-Liquid (variant X0 or X2) in pipette bottle
- quick guide

DD Incisal X – X2

Translucency-increasing liquid with colouring oxides

Create with minimal effort a real and optical translucency increase through bluish/grayish/violet color effect.

DDcontrast®

color and form concept by *A. Wille*

DD contrast®, the color and texture system from Dental Direkt, gives full monolithic restorations optimum color dynamics, vivid depth effect and various intensities of fluorescence. It creates a wonderful symbiosis with the color and light systems of our monolithic zirconium oxides.

DD contrast® color

- Body, mamelon and effect colors to create characteristic contrasts of light and dark, warm and cold.
- Creation of natural looking tooth effects such as translucency and mamelons.
- With »fissure« the system contains a marking color.

Body colors		Order-no. / 4 g	FG	Price (euro/net)
	dentin A	DDCCDA	F+	47,00
	dentin B	DDCCDB	F+	47,00
	dentin C	DDCCDC	F+	47,00
	dentin D	DDCCDD	F+	47,00
Mamelon colors				
	mamelon maize	DDCCMM	F+	47,00
	mamelon corn	DDCCMC	F+	47,00

	dark gray	DDCCDG	—	47,00
	violet	DDCCVI	—	47,00
	blue	DDCCBL	—	47,00

Consult instructions for use.

Not all products are available in every country.

DD contrast® texture

- Individual modeling of surface structures.
- Vivid depth effect and color intensity on monolithic crowns starting with a minimum layer thickness of 0.1 mm.
- Natural color effect and light dynamics are achieved by a fine feldspar structure.
- Special dentines for increasing the color intensity, of the brightness value and opacity in the labial and buccal area.
- Can be used without additional glaze firing.

Enamel masses	Order-no. / 4 g	FG	Price (euro/net)
 enamel 59	DDCTE59	F+	51,00

Fluorescence Grade (FG):   

DD contrast® color, DD contrast® texture and DD contrast® glaze have various intensity of fluorescence.

For a better orientation we have designated the level of intensity as follows: F = low fluorescence, F+ = high fluorescence and F++ = very high fluorescence.

Consult instructions for use.

Not all products are available in every country.

DD contrast® glaze

DD contrast® glaze clear (non-fluorescent):

- To seal the surface.
- Glaze with a slight opacity/gray shimmer.
Especially advantageous for elderly patients whose teeth are more translucent.

DD contrast® glaze clear fluor (fluorescent):

- To seal the surface.
- Especially in the body area you can achieve the necessary fluorescence – just like with a natural tooth.

Glazes	Order-no. / 4 g	FG	Price (euro/net)
glaze clear	DDCGC	—	43,00
glaze clear fluor	DDCGCF	F++	43,00

DD contrast® liquid

The **DD contrast® standard liquid** can only be used for diluting DD contrast® colors and DD contrast® glaze pastes. With the liquid you can adjust the thickness of the transparent layer.

For the DD contrast® texture pastes, only the **DD contrast® texture liquid** should be used to maintain the special consistency and modelling ability of the material. However, **DD contrast® texture liquid** can also be used with DD contrast® colors and DD contrast® glaze pastes to modify the consistency.

Liquids	Order-no. / 30 ml	Price (euro/net)
standard liquid	DDCSLI	12,50
texture liquid	DDCTLI	12,50

DD contrast® firing paste – the ultimate ceramic firing paste for object fixation

- Stabilizes even difficult ceramic works during the firing process.
- Zero clean-up is required – just a blast of compressed air is sufficient.
- No annoying scraping out or sandblasting after the firing process.
- No drying time is required.

Article	Order-no.	Price (euro/net)

High Performance Polymers

04

DDBioSplint^{PHI}

high impact thermoplastic

Polymethylmethacrylate (PMMA)

PMMA for occlusal splints

DD Bio Splint P HI are transparent thermoplastic blanks based on polymethylmethacrylate (PMMA) and suitable for the fabrication of bite splints. In the CAD/CAM process, you achieve reproducible results with little post-processing effort.

Benefits

- Biocompatible
- High stability due to high impact modification
- Very good polishing properties
- Possible to bond to conventional polymers
- Bisphenol A free

Technical data

Material	100% Polymethylmethacrylate (PMMA)
Classification	Class IIa according to MDD/MDR
Indication	Splints, therapeutic splints, bite regulators (indicated for the long-term use in the oral cavity)
Color	clear
Flexural strength ISO 20795-2	64 MPa
Flexural modulus ISO 20795-2	≥ 1950 MPa
Fracture toughness ISO 20795-2	2,0 MPa m ^{1/2}
Water absorption ISO 20795-2	< 24 µg/mm ³
Solubility ISO 20795-2	< 0,13 µg/mm ³
Residual monomer ISO 20795-2	< 0,7 %
CAM system	open systems for Ø 98,5 mm blanks

Measure	Order-no.	Price (euro/net)

DDBioSplint^C

innovative polycarbonate

Polycarbonate (PC)

Polycarbonate for occlusal splints

DD Bio Splint C blanks consist of a biocompatible polycarbonate for use in medical devices. In the CAD/CAM process, you achieve reproducible results with little post-processing effort.

Benefits

- Biocompatible
- Low level of flexibility
- Extremely high stability
- Very good polishing properties
- Possible to bond to conventional polymers

Technical data

Material	100% Polycarbonate (PC)
Classification	Class I according to MDD/MDR
Indication	Splints, therapeutic splints, bite regulators, drilling templates (indicated for the short-term use in the oral cavity)
Color	clear/slightly bluish
Flexural strength ISO 20795-1	≥ 98 MPa
Flexural modulus ISO 20795-1	> 2.300 MPa
Water absorption ISO 20795-1	3,6 µg/mm ³
Solubility ISO 20795-1	0,2 µg/mm ³
residual monomer content ISO 20795-1	≤ 0,0015 %
CAM system	open systems for Ø 98,5 mm blanks

Measure	Order-no.	Price (euro/net)
98,5 x 15 mm	K 2.01.15	47,00
98,5 x 20 mm	K 2.01.20	53,00

Consult instructions for use.

DDBioSplintFLEX

flexible thermoplastic

Polyethylenterephthalat-Glycol (PETG)

PETG for bite splints

The DD Bio Splint FLEX blanks are made of the biocompatible copolymer PETG for use in medical devices. The material is characterised by high flexibility and simultaneously high impact strength. In the CAD/CAM process, you achieve reproducible results with little post-processing effort.

Benefits

- Biocompatible
- High level of flexibility
- Good polishing properties
- Possible to bond to conventional polymers (with bonder)
- Bisphenol A free

Technical data

Material	100% Polyethylenterephthalat-Glycol (PETG)
Classification	Class I according to MDD
Indication	Flexible splints, therapeutic splints, bite regulators, drilling templates (Indicated for short-term use in the oral cavity)
Color	clear
Flexural strength ISO 20795-1	≥ 58 MPa
Flexural modulus ISO 20795-1	≥ 1.370 MPa
Fracture toughness ISO 20795-1	≥ 3 MPa m ^{1/2}
Water absorption ISO 20795-1	6 µg/mm ³
Solubility ISO 20795-1	< 0,25 µg/mm ³

DDproviP^{HI}

high impact thermoplastic

Polymethylmethacrylate (PMMA)

PMMA for temporary restorations

DD provi P HI is a monochromatic colored milling blank and based on the raw material of our proven DD Bio Splint P HI. The material is perfectly balanced in terms of translucency and opacity and adapted to the VITA® Classic shades.

Benefits

- Biocompatible
- High stability due to high impact modification
- Very good polishing properties
- Customizable
- Possible to bond to conventional polymers

Technical data

Material	Polymethylmethacrylate (PMMA)
Classification	Class IIa according to MDD/MDR
Indication	Temporary crowns and bridges (indicated for the long-term use in the oral cavity)
Flexural strength ISO 20795-1	65 MPa
Flexural modulus ISO 20795-1	2.030 MPa
Fracture toughness ISO 20795-1	2,6 MPa m ^{1/2}
Water absorption ISO 20795-1	< 24 µg/mm ³
Solubility ISO 20795-1	< 0,3 µg/mm ³

DDpolyX^{ML}

multilayer – natural colored polymers

Polymethylmethacrylate (PMMA)

Acrylic Polymer

DD poly X ML blanks consist of multilayer acrylic polymer based on polymethylmethacrylate (PMMA).

Benefits

- Biocompatible – medical polymer material
- 5 color layers for a natural aesthetic effect
- Excellent hardness and abrasion resistance
- Good polishing properties
- Customizable with composite

Technical data

Material	Polymethylmethacrylate (PMMA)
Classification	Class IIa according to MDD/MDR
Indication	Implant-supported temporary restorations, temporary crowns and bridges with up to two connected pontics in the front and side tooth area (maximum recommended usage without check-up by dentist is 12 months)
Flexural strength ISO 10477	90 MPa
Flexural modulus ISO 20795-1	2.300 MPa
Water absorption ISO 10477	25 µg/mm ³
Solubility ISO 10477	0,0 µg/mm ³

DDbase^{PHI}

high impact thermoplastic

Polymethylmethacrylate (PMMA)

PMMA for digital denture bases

DD base P HI are gingiva-colored milling blanks based on the raw material of our proven DD Bio Splint P HI. The material is ideally suited for the production of digital denture bases and indicated for the long-term use in the oral cavity.

Benefits

- Biocompatible
- High stability due to high impact modification
- Very good polishing properties
- Very good bond to denture teeth
- Available in four colors

Technical data	
Material	Polymethylmethacrylate (PMMA)
Classification	Class IIa according to MDD/MDR
Indication	Denture bases for removable dentures (indicated for the long-term use in the oral cavity)
Flexural strength ISO 20795-1	65 MPa

DDpeekMED

the polymer steel

Polyether ether ketone

Medical PEEK

DD peek MED are biocompatible milling blanks based on the high-performance polymer polyetheretherketone.

Benefits

- For allergy patients suitable
- Free from monomer
- Extremely loadable
- Several colours for different applications

Technical data

Material	Polyether ether ketone (PEEK)
Classification	Class IIa according to MDD/MDR
Indication	For the manufacture of fixed or removable dental framework constructions for long-term use. e.g. abutments and cervical gingival formers, bar constructions, tertiary constructions, telescope crowns, transversal links (indicated for the long-term use in the oral cavity)
Flexural strength* ISO 20795-1	≥ 155 MPa
Flexural modulus* ISO 20795-1	≥ 3,8 GPa
Density* ISO 1183	1,5 g/cm³
Water absorption* ISO 20795-1	0,0 µg/mm³

DDBioCW

Milling blank based on CoCr

The DD Bio CW blanks provide a high level of working safety and guarantees reliably good quality. Outstanding aesthetic results can be achieved by a veneering with a material-specific veneering ceramic. The adherence oxide formers provide an optimal bond between metal and ceramic.

The DD Bio CW blank has been treated with a special heat treatment, which makes the alloy easy to machine and gives it outstanding properties due to a uniform microstructure.

Benefits

- Corrosion resistant
- Free from nickel, cadmium and beryllium
- Optimum metal-ceramic bond

Technical data

Density	8,8 g/cm ³
E modulus	250 GPa

DDcamWAX

Wax for casting technique

Synthetic wax blanks utilised for the production of combustible wax frameworks that leave no residue. DD CAM wax blanks are distinguished by excellent milling properties and form a fine chip during the machining that does not clog milling cutters (non-medical product).

Specification

CAM system open systems for Ø 98,5 mm blanks

Measure	Order-no.	Color	Price (euro/net)
98,5 x 20 mm	G 529	gray	32,00

DDcalibrationdisc

The DD calibration disc made of polyurethane is used to calibrate your milling machine. After milling a special calibration body, you measure them and enter these values into the program. The milling machine will guide you through the calibration process step by step (non-medical product).

Accessories

06

DDShadeGuide

Make your own DD Shade Guide

With the DD Shade Guide, an individual and practice-oriented shade guide is prepared, which is tailored to the zirconium oxides used and the workflow in the dental laboratory. In this way, the tooth shade is determined directly with the respective restoration material. This ensures a much better expectation of the shade effect and improves the reproducibility of the same. This minimizes the risk of a prosthetic failure due to incorrect shade taking.

Example: DD Shade Guide (set of 8 colors) with DD Bio ZW iso color

Benefits

- Shade guide made of the zirconia material of your choice
- 100 % reproducibility
- No transfer errors during color matching due to your own, individual color key

Set content

Sticks and fixation clips
(number according to colors)

DD Shade Guide holder
(Set of 8 or 16)

Stl. data record on USB stick

DDphoeniX

reviving cleaning powder

Despite careful consideration of all important aspects of the laboratory process, discoloration and contamination of the objects may occur. A frequent reason for this are oxides from the heating elements and their deposition in the furnace chamber.

Due to its special granulation, the DD phoeniX cleaning powder has a very reactive surface, which attracts the oxides in the furnace chamber and binds them permanently. Thus supports efficiently the cleaning process.

Benefits

- No molybdenum-caused green discoloration of the sintered objects
- Binds the contaminations from the furnace atmosphere and supports the cleaning
- Regular use increases the color consistency and reproducibility of your results

Important note

Among the high-temperature furnaces for dental use mainly furnaces with heating elements made of molybdenum disilicide (MoSi_2) are affected by oxidic precipitation and discoloration. The sintering furnaces available from Dental Direkt heat with siliciumcarbide heating elements (SiC). Discoloration or contamination are not caused by SiC heating elements.

DDSolidLink

Universal dual-curing composite based luting for intra and extraoral use

The DD Solid Link is a permanent luting solution for all common dental materials. Due to the reliable and precise luting is the fixation guaranteed. DD Solid Link forms the link between the sub- and suprastructures.

Benefits

- Permanent luting for the common dental materials
- Universal solution, for intra- and extraoral usage
- Perfect masking properties for discolored or titanium bases with highly opaque shades
- Working time approx. 2 min.
- Setting time extraoral (23 °C) approx. 7 min.
- Setting time intraoral (37 °C) approx. 4 min.

Three shades for the perfect color matching

The DD Solid Link is available in two highly opaque (white/high opaque and dentine/high opaque) colors and additionally in a translucent shade.

Content

- 10 g DD Solid Link
- 10 Mixing tips type 9
- Instructions for use

Technical data

Classification	Class IIa according to MDD
Indication	<p>Permanent extra- and intraoral luting of suprastructures (incl. mesostructures) made of metal, ceramics, zirconium dioxide and polymers (composite, hybrid-ceramics or PMMA)</p> <ul style="list-style-type: none"> • Prefabricated adhesive/titanium bases (only extraorally) • Customised titanium and zirconium dioxide abutments (extra- and intraorally) • Tooth structure
Chemical composition (in descending order according to content)	Barium aluminum borosilicate glass, Titanium dioxide, HEDMA, BisGMA, fluorosilicate glass, pyrogenic silicon dioxide, initiators, stabilizers, color pigments
3-Point flexural strength* ISO 4049	119 MPa
Shear Bond strength on zirconium dioxide** ISO/TS 29022	24.4 MPa
Shear Bond strength on titanium** ISO/TS 29022	25.1 MPa
Shear Bond strength on lithium disilicate** ISO/TS 29022	21.7 MPa

DDUniBond

Bonding agent for ceramics, metal and composite

The one-component DD Uni Bond coupling agent provide a durable adhesive bonding between indirect restorations and DD Solid Link.

Benefits

- Creates optimal conditions for the permanent link
- Easy to use – no mixing necessary

Content

- 5 ml DD Uni Bond
- Instructions for use

Technical data

Classification	Class IIa according to MDD
Indication	DD Uni Bond is used as a coupling agent to achieve an optimal bond strength between indirect restorations made of either silicate ceramics, aluminium oxide, zirconium dioxide, metal or composite, as well as glass fibre-reinforced composite posts, on the one side and methacrylate-based luting composites on the other side.
Chemical composition	Organic acid, 3-methacryloxy-propyltrimethoxysilane and acetone

DDUniBondD

Bonding agent for the tooth structure

The DD Uni Bond D is a dual-curing, self-etching nano-composites reinforced bond for creating a durable bonding between the tooth structure and DD Solid Link.

The DD Uni Bond D consists of 2 components.

Benefits

- Chemical bonding for areas where is light-curing not possible
- Eliminates the need for a separate etching step yet still achieves the same adhesive properties as total-etch bonds
- Tolerates residual moisture
- Durable marginal fitting

Content

- 4 ml Liquid 1
- 4 ml Liquid 2
- 50 single use brush / applicators
- 2 Mixing trays
- Instructions for use

Technical data

Classification	Class IIa according to MDD
Indication	Direct self-curing or dual-curing composite restorations and core build-ups
	Direct light-curing composite/ compomer/Ormocer®-based restorations
Chemical composition	Fixing of root pins/posts with dual-curing or self-curing composite cements
	Indirect restorations; when using dual-curing/self-curing composite cements for bonding of inlays, onlays, crowns and bridges
Chemical composition	Organic acids, Bis-GMA, HEMA, TMPTMA, campherchinon, amines (DABE), BHT, catalysts, fluoride and ethanol.
